YAMINI SRI NIKITHA MOTURI

Telangana, India | myaminisrinikitha@gmail.com | LinkedIn | +91 6281337566

PROFESSIONAL SUMMARY

Data Science & Artificial Intelligence graduate with experience in AI quality assessment, business analytics, and data-driven decision-making. Proficient in Python, SQL, Excel, and Power BI, with hands-on experience in machine learning, market research, and data analysis. Passionate about leveraging analytics and AI to solve real-world business challenges and drive strategic decision-making.

SKILLS

Programming & Databases: Python (Pandas, NumPy), SQL
Data Analytics: Excel, Power BI, Google Analytics, Data Visualization
AI & Machine Learning: AI Model Evaluation, Prompt Analysis, Data Quality Assessment, Fact Verification
Business Analytics: Market Research, Competitor Analysis, KPI Tracking, Requirements Gathering, Business Reporting

RELEVANT EXPERIENCE

AI Quality Analyst – Turing *March 2026 – Present*

- Assessed AI models from various projects for quality, precision, reasoning, and policy adherence.
- Investigated conversational AI exchanges and application processes to aid in model advancement.
- Verified AI outputs, recorded observations, and participated in quality assurance and process enhancements.

Business Analytics Intern – Inspire Leap Pvt Ltd *Jun 2025*

- Handled requirements gathering and reporting to stakeholders for new product initiatives.
- Assisted with initial market research and competitor analysis to identify opportunities.
- Contributed to performance report preparation for customer engagement improvement.

Data Analytics Intern – Medintu Health Solutions *Jan 2025 – Jun 2025*

- Developed basic dashboards and reports to monitor traffic and engagement metrics.
- Assisted the marketing team with data analysis using Google Analytics and SQL.
- Supported content optimisation through data-driven analysis.

PROJECTS

Intelligent Energy Optimization in Smart Homes Using Machine Learning *Mid-term Academic Project*

- Researched machine learning techniques to optimize residential energy consumption in smart home environments.
- Explored predictive modeling, data preprocessing, and adaptive control strategies for intelligent energy management.
- Evaluated challenges related to AI integration, data privacy, and interoperability in smart home systems.

Customer Churn Prediction Using Machine Learning *Final Academic Project*

- Developed a machine learning model to identify customers at risk of churn using historical customer data.
- Performed data cleaning, exploratory data analysis, and feature engineering to improve model performance.
- Evaluated classification models using performance metrics to support data-driven customer retention strategies.

EDUCATION

Bachelor of Technology in Data Science & Artificial Intelligence
The ICFAI Foundation for Higher Education, Hyderabad *Aug 2021 – May 2025*

Relevant Coursework: Machine Learning, Data Science, Artificial Intelligence, Data Mining, Database Management Systems, Statistics, Data Visualization, Business Intelligence.

CERTIFICATIONS

Power BI for Beginners – SimpliLearn (Microsoft-powered)
Introduction to Data Analytics - SimpliLearn
Introduction to Python – Kaggle
Introduction to AWS - AWS Education
Matlab On-ramp – MathWorks
Human Resource Management Specialization – University of Minnesota (Coursera)

Extracurricular Activities

Volunteer, Pawzz Foundation: Supported animal welfare initiatives through digital outreach, awareness campaigns, and community engagement.

Languages Known

English (Professional Proficiency), Telugu (Native), Hindi (Competent), German (Elementary Level)
